

Magentus "IPv6" tesztelési jegyzőkönyv

Dátum: 2026. 02. 08.

A dokumentum célja: A Magentus ISP hálózatban fellépő "single router fault" (egy router hiba) esemény hatásainak bemutatása és tesztelése IPv6-on. A vizsgálat során az Ügyfél (Customer) routerén futtatott traceroute 2001:4860:4860::8888 parancsal ellenőrizzük az útvonalválasztást.

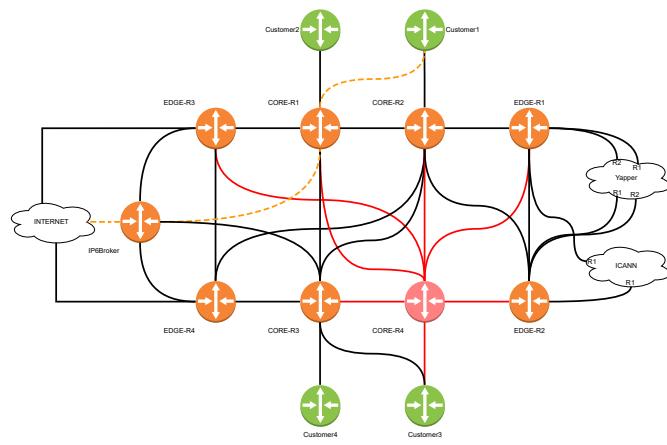

Jelmagyarázat: Az ábrákon a meghibásodott linket **piros vonal**, míg a traceroute által felderített aktív útvonalat **sárga szaggatott vonal** jelöli.
